INDEX

Metals Engineering Quarterly **Volume 6, 1966**

Index of Authors

(The first number cited is the issue number, the second is the page.)

Hosford, William F., Jr. ..... 4—13
Hurley, J. L. ..... 2—25
Irvine, Charles N. ..... 4—52
Kahles, John F. ..... 3—32
Kaufman, J. G. ..... 1—48
Kies, J. A. ..... 4—37
Knoth, R. J. ..... 2—49
Koster, William P. ..... 3—32
Lang, F. H. ..... 2—49
Leggett, H. ..... 4—31
Lucas, William R. ..... 1—58
Lund, C. H. ..... 1—63
Mackiw, V. N. ..... 2—54
Manganello, S. J. ..... 3—17
Maynor, Hal W., Jr. ..... 1—20
McDanels, David L. ..... 3—51
McMaster, R. C. ..... 2—32
Macorrito, W. L. ..... 4—24
Mikus, E. B. ..... 1—35
Nelson, F. G. ..... 1—48
Ostrofsky, Bernard ..... 3—9
Otte, H. M. ..... 1—43
Peaslee, R. L. ..... 1—55
Pellini, W. S. ..... 4—1
Porter, L. F. ..... 3—17
Romanchuk, S. ..... 2—54
Romine, H. E. ..... 4—37
Ryan, R. S. ..... 4—19
Schmatz, D. J. ..... 2—20
Schwab, D. E. ..... 4—31
Schwartz, Mel M. ..... 4—47
Shelton, C. H. ..... 2—25
Signorelli, Robert A. ..... 3—51
Silins, V. ..... 2—54
Simenz, R. F. ..... 4—24
Smith, H. L. ..... 4—37
Stone, L. H. ..... 1—35
van Torne, L. I. ..... 1—43
Watson, B. R. ..... 4—56
Wendell, C. R. ..... 1—1
Yang, C. T. ..... 3—46
Zoeller, H. W. ..... 1—16
Zukas, E. G. ..... 2—1

Subject Index

Abrasive grinding ..... 3—35-42
Acoustoelastic measurements ..... 3—14-16
Adhesive bonding
  of bulkheads ..... 4—54
Age hardening
  of Ni-Cu steels ..... 2—25-31
Aging
  in 2219 Al alloy ..... 1—43-47
Aircraft components ..... 1—17-19
Aluminum alloys
  fracture ..... 1—48-55
  in liquid rockets ..... 1—59-60
  notch toughness of welds ..... 1—51-54
  tear resistance of welds ..... 1—49-51
  tear tests of welds ..... 1—50
  tensile tests of welds ..... 1—49-53
  for rigid containers ..... 4—8-13
  properties ..... 4—9-12
  vacuum brazing ..... 4—47-48
Aluminum alloys, specific types
  5052
    use in rigid containers ..... 4—9-12
  H19
    use in rigid containers ..... 4—11-12
  2014-T6
    crack propagation ..... 3—46-51
  2219
    bulkhead fabrication ..... 4—52-56
Aluminum composites
  in liquid rockets ..... 1—62
Aluminum-copper alloys, specific types
  2219 Al
    aging behavior ..... 1—43-47
    explosive deformation ..... 1—43
Aluminum honeycombs
  in liquid rockets ..... 1—61
Alvin research submarine ..... 4—1-2
Anisotropy ..... 4—13-14
Ausformed steels ..... 2—23-24
Ausforming ..... 2—20-24
Austenite
  ausforming ..... 2—20-24
Battelle drop weight tear test ..... 3—1-9
Beryllium
  in liquid rockets ..... 1—62
Beryllium composites
  in liquid rockets ..... 1—61-62
Bonds and bonding ..... 1—63-64
Coatings
  nondestructive testing ..... 2—45-47
  see also Seals
Color radiography ..... 3—9-11
Bulkheads
  adhesive bonding ..... 4—54
  aging ..... 4—54
  fabrication ..... 4—52-56
  forming ..... 4—54
  testing ..... 4—54-56
  welding ..... 4—54
Chemical milling
  in bulkhead fabrication ..... 4—53
  of gores ..... 4—54
Combustion heating
  of liquids ..... 4—56-60
Composite casting ..... 1—63-64
Composites
  in liquid rockets ..... 1—61
Compressive stress ..... 1—9-12
Concave forming and bonding tools ..... 4—53
Continuum plasticity ..... 4—13-14
Crack propagation
  of Al alloys ..... 3—46-51
  of stainless steels ..... 3—46-51
Cryogenics
  applied to liquid rockets ..... 1—58-62
Cubic metals
  texture strengthening ..... 4—17-18
Cutting tools ..... 1—1-2
Dagger fittings ..... 1—18
Densifying
  of Ni ..... 2—56
Diffusion sink brazing
  of Ta-10W with Ti ..... 1—35-42
Displacement measurements ..... 2—45-47
Ductility
  of W wire ..... 3—52-54, 57-58
Eddy current measurements ..... 2—32-49
Elastic wave pressures ..... 2—2
Elastic waves ..... 2—10-11
Electric conductivity
  nondestructive test method ..... 2—35-40
Electric discharge grinding ..... 3—35-42
Electrochemical grinding ..... 3—35-42
Electron microscopy
  of aging in 2219 Al alloy ..... 1—43-47
  of high-strength steels ..... 1—24-29
Electronic devices ..... 1—30-34
Explosive bonding ..... 2—60-64
Explosive deformation
  of 2219 Al alloy ..... 1—43
Extensometers ..... 4—32-36
Face milling ..... 3—35-42
Fatigue ..... 1—9-15
  3—59-62
Ferromagnetic conductors
  nondestructive testing ..... 2—40-45
Forging
  of Ti alloys ..... 4—24-30

Fracture
of Al alloys ... 1—48-55
3—46-51
of high-strength steels ... 3—1-9
of stainless steels ... 3—46-51
Fracture toughness
in maraging steels ... 4—40-47
Free jet ... 2—63
Frozen jet ... 2—63-64
Gas transmission pipelines ... 4—19-24
Goodman effect ... 1—14-15
Gores ... 4—53-54
Hcp metals
texture strengthening ... 4—14-17
Heat exchangers ... 2—61
Heat transference ... 3—16
Hugoniot curves ... 2—5-7
Hydrospace vehicles ... 4—1-8
Immersion burners ... 4—57-59
Immersion heating ... 4—56-57
Integrated circuits
use of thermocompression welding ... 1—35
Iron
effect of shock waves ... 2—9-10
equation of state curve ... 2—7-8
Isotropy ... 4—13
Joining
of metals ... 4—47-51
Landing gear cylinders ... 1—17-18
Landing gear trucks ... 1—19
Liquid rockets
use of metals ... 1—58-62
Magnetic field measurements ... 2—40-45
Magnetic permeability
nondestructive test method ... 2—40-45
Magnetic Reaction Analyzer ... 2—32-49
Maraging steels
weld properties ... 3—30
Maraging steels, specific types
18 Ni
ductility ... 1—22-24
fracture toughness ... 1—20-22
physical properties ... 2—49-50
weld properties ... 2—51-52
welding ... 2—49-50
yield strength ... 1—22-24
18 Ni grade 200
fracture toughness ... 4—40-47
mechanical properties ... 4—38
weld toughness ... 4—37-47
18 Ni grade 250
abrasive grinding ... 3—34-35, 39, 43
electrical discharge grinding ... 3—35-36, 40
electrochemical grinding ... 3—35, 40
face milling ... 3—34-35, 37
fracture toughness ... 4—40-47
mechanical properties ... 4—39
microhardness ... 3—44
physical properties ... 2—49-50
weld properties ... 2—51-52
weld toughness ... 4—37-47
12Ni-5Cr-3Mo steels
development to produce 160 to 210 ksi yield strength ... 3—28-29
Microhardness
of W wire ... 3—52, 54
Nickel-copper steels
age hardening ... 2—25-31
impact properties ... 2—25-31
mechanical properties ... 2—28, 31
tensile properties ... 2—25-31
welding ... 2—31
Nickel powders ... 2—55-56
Nickel strip
applications ... 2—59-60
chemical properties ... 2—58
magnetic properties ... 2—59
manufacture ... 2—54-57
mechanical properties ... 2—58-59
physical properties ... 2—59
Nicroseal coatings ... 1—55-58
Nondestructive testing ... 2—32-49
3—9-17
Nonmagnetic conductors
nondestructive testing ... 2—35-37
Plastic compressive waves ... 2—2
Powder rolling
of Ni ... 2—55-56
Pressure hulls ... 4—1-8
Pressure vessels ... 2—61
using Al alloys ... 1—48
Prestressing ... 3—59-62
Radiography see Color radiography
Rarefaction waves ... 2—2
Refractory metals
vacuum brazing ... 4—49-50
Residual stresses
effect on fatigue ... 1—12-14
Retorts ... 2—61
Rigid containers
characteristics of Al alloys ... 4—8-13
Safety
Titanium fires ... 3—62-63
Saturn V rocket ... 1—58
Seals
for turbines ... 1—55-58
Semiconductors
use of thermocompression welding ... 1—35
Shock loading
effect on microstructural changes ... 2—12-15
effect on recovery assemblies ... 2—11-12
hardening and strengthening ... 2—15-18
Shock waves ... 2—1-20
pressure relationships ... 2—6-7
surface velocity ... 2—3-4
Shot peening ... 1—16-19
Sintering
of Ni ... 2—56
Stabilators ... 1—18-19
Stainless steels, specific types
301
crack propagation ... 3—46-51
310
crack propagation ... 3—46-51
Steels
ausforming ... 2—20-24
development of high yield strength ... 3—17-32
thermomechanical treatments ... 2—20-24
vacuum brazing ... 4—48-49
Steels, high-speed
development of new types ... 1—1-9
raising optimum heat treated hardness ... 1—2-9
Steels, high-strength
fracture ... 3—1-9
studied by electron microscopy ... 1—24-29
use in gas transmission pipelines ... 4—19-24
Steels, specific types
AISI-SAE types
4340
abrasive grinding ... 3—34-35, 37-38, 40
electrical discharge grinding ... 3—35-36, 41
electrochemical grinding ... 3—35, 41
face milling ... 3—34-35, 40
microhardness ... 3—44
D6AC
abrasive grinding ... 3—34-35, 41
electrical discharge grinding ... 3—35-36, 42
electrochemical grinding ... 3—35, 42
face milling ... 3—34-35, 41
microhardness ... 3—45
5Ni-Cr-Mo-V steel
development to produce 180 to 200 ksi yield strength ... 3—23-29
development to produce 130 to 150 ksi yield strength ... 3—20-23
heat treatment ... 3—30-31
high C quenching and tempering ... 3—24-26
low C quenching and tempering ... 3—26-28
tempering ... 3—20-21
Strain measurement systems ... 4—32-33
Stress-corrosion cracking ... 1—16-17
Stress-corrosion resistance
applied to liquid rockets ... 1—58-62
Stress-rupture
of W wire ... 3—52-58
Stretch form tools ... 4—52
Submerged combustion ... 4—59-60
Super alloys
tensile testing ... 4—31-37
vacuum brazing ... 4—48-49
Surface velocity
of shock waves ... 2—3-4
Tantalum alloys
vacuum brazing ... 4—50-51
Tantalum alloys, specific types
Ta-10W alloy
diffusion sink brazing with Ti ... 1—35-42
ductility ... 1—40
remelt temperature ... 1—40
Tensile stress
effect on fatigue ... 1—9-11
Tensile testing ... 4—31-37
Terminal fittings ... 1—19
Texture strengthening ... 4—13-19
of hcp metals ... 4—14-17
of cubic metals ... 4—17-18
Thermocompression welding ... 1—29-35
advantages and disadvantages ... 1—34-35
methods ... 1—30-34
Titanium
use in diffusion sink brazing ... 1—37-41

Titanium alloys
vacuum brazing ..... 4—48-49
Titanium alloys, specific types
IMI 679
fatigue properties ..... 4—29-30
forging ..... 4—25-26
forging static tests ..... 4—28-29
tensile properties ..... 4—26-28
Ti-8Al-1Mo-1V
abrasive grinding ..... 3—34-35, 42
electrical discharge grinding ..... 3—35-36, 43
electrochemical grinding ..... 3—35, 43
face milling ..... 3—34-35, 42
microhardness ..... 3—45
Titanium alloys, specific types
Ti-6Al-4V
fatigue properties ..... 4—29-30
forging ..... 4—25-26
forging static tests ..... 4—28-29
tensile properties ..... 4—26-28
Ti-6Al-6V-2Sn
fatigue properties ..... 4—29-30
forging ..... 4—25-26
forging static tests ..... 4—28-29
tensile properties ..... 4—26-28
Titanium alloys, specific types
Ti-13V-11Cr-3Al
fatigue properties ..... 4—29-30
forging ..... 4—25-26
forging static tests ..... 4—28-29
tensile properties ..... 4—26-28
Titanium fires
prevention and control ..... 3—62-63
Titanium forgings ..... 4—24-30
Tool steels ..... 1—1-9
Tool steels, specific types
M2
heat treating characteristics ..... 1—3-5
M10
heat treating characteristics ..... 1—3-5
influence of N and C on hardness ..... 1—5-6
M40
properties ..... 1—6-8
Tooling
in bulkhead fabrication ..... 4—52
Trunnion support rib fittings ..... 1—19
Tungsten fibers see Tungsten wire
Tungsten wire
ductility ..... 3—52-54, 57-58
microhardness ..... 3—52, 54
stress-rupture ..... 3—52-58
Turbine seals ..... 1—55-58
Twinning
of hcp metals ..... 4—15
Ultrasonic attenuation ..... 3—10-13
Ultrasonic imaging ..... 3—13-14
Ultrasonic transmission ..... 3—16
Underfiring ..... 4—56
Vacuum brazing ..... 4—47-51
Weld toughness
of maraging steels ..... 4—37-47
Welding
applied to liquid rockets ..... 1—58-62
of Al alloys ..... 1—48
of bulkheads ..... 4—54
of 18 Ni maraging steels ..... 2—49-53
of Ni-Cu steels ..... 2—31
of pipes ..... 4—20-24
Work hardening ..... 1—12-14
Yield stresses ..... 1—13
